# FIND PEACE AT WORK

**Increase Productivity** - With reduced distractions and improved concentration, employees can be more productive when using Kube office booths. They can make important calls, participate in conference calls, or conduct interviews & meetings without interruptions.

**Improve Communication And Clarity** - Our Office Range has been specifically designed to reduce noise levels and provide a pleasant acoustic environment for the spoken word.

**Reduce Distractions** - Open-plan offices can be noisy and filled with distractions, making it difficult to concentrate during meetings & calls. Kube Office booths offer a quieter environment, allowing employees to focus better on their conversations.

# MADE IN THE UK

Each Kube Office Booth is manufactured here in North Yorkshire, using only the highest quality materials, machinery, and of course, a good old pair of hands.

At Kube, we always strive to **reduce our carbon footprint** by **sourcing 90% of our materials locally**, ensuring they are **sustainable**, and by using **recycled materials** where ever possible.

Kube booths are currently the only Office Booths manufactured in the UK, meaning they are also **the most Eco friendly phone booths available in the UK**. A simple design, yet effective, robust and great value, in comparison to the only other options currently available on the UK market, commonly imported from China, Europe & the US.

# BUILT FOR YOU

Choose from 100's of colours to suit your style or company branding. Choose your texture - matt, gloss or wood effect.

Customise your interior with our range of slatted acoustic panels.

Customise convenience with upgradable power and media points.
